

HSE File - HEALTH SAFETY ENVIRONMENT

KU Leuven Faculty of Engineering Technology

Master of Electronics and ICT Engineering Technology (Leuven)

Name student: Jeroen Vastmans & Rui Zhu

Academic year: 2020-2021

Name traineeship, research: Early Sepsis Prediction from Clinical Data by Bart Vanrumste & Chetanya Puri

To the following HSE risks the student might be exposed during the study programma (practicals, excursions, projects, traineeships, bachelor's theses, master's theses):

- operating machines, tools and installation of experiments
- sharp objects (pricking risk)
- risk of fire, burning hazards
- handling with very hazardous products
- hazardous products

The preventive HSE follow-up for the above mentioned HSE risks will be carried out by the educational institution and includes:

- Maternity protection
- Protection during lactation

The implementation of the following preventive measures should be provided for the student at the place where activities with the above mentioned risks are carried out:

- Lab coat
- Gloves
- Safety glasses

This part has to be filled in by the organization/company (of the training, research):

Mention the additional HSE risks (not yet listed above) which occur in carrying out the activities during the traineeship or research:

- ☐ no additional risk
- ☐ other risks:

Following preventive measures will be organised by the organization/company for these additional HSE risks

If additional HSE risks are a reason for a medical follow-up this will be carried out by the educational institution of the student, unless otherwise indicated below:

☐ Medical follow-up by organization / company

Name and signature organization/company; date:

Name and signature educational institution; date:
